

InStruct Online - Phase Forward's Online Learning Offering

Key Features - Saves Time and Money

- Eliminates need for travel, sites can train at their respective locations
- Reduces site staff out of office time.
- Students learn at their own pace, course available 24/7.
- Product simulations and exercises enhance learning and increase retention of material.
- Certification provided upon completion of course
- Course access for one (1) year to allow review and refresh of information
- Documented testing of site personnel, in compliance with regulatory requirements
- Group and user success rates and completion metrics reporting available on request.
- Step-by-Step guide of all the features that pertain to a site, sponsor, or other trial staff
- InForm system certification valid for one (1) year from date of completion or longer with continual use of the system.

Exploring eCRF Fields and Icons

Roll your mouse pointer over the red highlighted areas in the Content Pane below to learn about the types of fields and icons found on an eCRF form.

The screenshot shows a web-based eCRF form for a patient named Tom Allen (CRA). The form is divided into sections: DEMOGRAPHICS and Family History. In the DEMOGRAPHICS section, field 4 is 'Screening Date' with a date picker. Field 5 is 'Height' with a text input field and radio buttons for 'cm' and 'm'. In the Family History section, field 6 is 'Marital Status' with a dropdown menu. Field 7 is 'Does the patient have any children?' with radio buttons for 'Yes' and 'No'. Field 8 is 'Does any member of the patient's immediate family have a history of depression?' with radio buttons for 'Unknown', 'No', and 'Yes, please check as many as apply:'. Under 'Yes', there are checkboxes for 'Grandparent', 'Parent', 'Parent's sibling', 'Sibling', and 'Other, specify'. A mouse cursor is shown hovering over the 'Yes' radio button in field 7, and red boxes highlight the date field, height input, marital status dropdown, 'Yes' radio button, and the family history options.

Online Training for InForm software

The InStruct Online solution is the easy to use, e-learning component of Phase Forward's InStruct training portfolio. The Internet based training solution for users of the InForm system provides a cost effective, multi-site training solution for global clinical trials

Providing this solution allows a client to cost effectively train large numbers of remote users effectively without loss of productivity due to traveling.

By allowing users to learn in a self-paced training environment, InStruct Online enables rapid, worldwide, documented course certification and re-certification.

Thorough Instruction Remotely

InStruct Online is identical in content to our instructor led courses, but packaged to enable remote learning. Access to a full simulation of the InForm system including a sample database is provided. InStruct Online users can explore different functions within the system and see the impact of correct and incorrect usage models. This experience helps them use the system more effectively.

Targeted Modules by Role

With targeted modules for Clinical Research Associates, Clinical Research Coordinators, Clinical Data Managers and US or International based International Principal Investigators, InStruct Online provides focused instruction and certification for all these roles.

Certification and Administration

Upon course completion and a formal testing process, users will receive a Certificate of Completion in electronic PDF format. In addition, each user receives access to the course materials for one (1) year. Phase Forward InStruct Online Administrators have access to reports used to track individual user success rates, learning time, and other management information to assure the effectiveness of the training program.
